PROFILE

I'm Mauricio, a full stack developer. I like taking a problem from start to finish: understanding what the business needs, designing the architecture and building every layer, from the interface to the database.

I write clean, maintainable code, I care about performance and SEO, and I don't consider a project finished until it's live and working well.

FEATURED PROJECTS

OFFBEAT — MOBILE APP · FEATURED APP

Local, offline and free music player for phones. My most complete project: an app to listen to the music stored on your phone, with no internet connection, no accounts and completely free. Built to be fast, simple and pleasant to use every day.

Mobile app · 100% offline · Free

EMPA-MARKET — ONLINE STORE

empa-market.vercel.app ↗

Artisan empanada shop with WhatsApp ordering. Online store with an optimized checkout flow, product filters and a design focused on conversion and usability.

HTML5 · CSS3 · JavaScript

FOTOCOPIADO UNAJ — SOFTWARE

System for the university's copy centers. Custom web application with an admin panel and per-center access (Health, Social Sciences, Engineering and HEC). Modular design and optimized performance.

HTML5 · CSS3 · JavaScript · Bootstrap · Database

OKLAHOMA STUDIO — LANDING PAGE

oklahoma-studio.vercel.app ↗

Website for a professional barbershop. Modern website for a professional barbershop, with a polished design focused on quality and on conveying a premium experience.

HTML5 · CSS3 · JavaScript · Bootstrap

VAULTMAIL — SOFTWARE

vaultmail.vercel.app ↗

Secure email and password manager. Credential manager to store and manage emails and passwords securely, with categories, favorites, search, and data import and export.

HTML5 · CSS3 · JavaScript · Bootstrap

POWERLAB GYM — LANDING PAGE

powerlab-gamma.vercel.app ↗

Gym website. Gym website with a modern design, focused on performance, with clear sections to present services, plans and trainers.

HTML5 · CSS3 · JavaScript

BECAS UNAJ — SOFTWARE

Photocopy scholarship system for students. System to manage UNAJ students' photocopy scholarships: student registration and search, tracking of used and remaining pages, prints per shift and history.

HTML5 · CSS3 · JavaScript · Bootstrap · Database
